

# Trevi Environmental Solutions – Water Treatment Operator (Poland)

## **Who are we looking for?**

We are looking for a practical, motivated professional who enjoys working on-site and taking ownership.

## **Your profile:**

- Background or experience in:
  - process operations, chemistry, environmental technology, or electromechanics
- Initial experience in an industrial environment is a plus, but not required
- Strong technical insight and problem-solving mindset
- Able to work independently and take responsibility
- Willing to complete a training period in Belgium and then work in Poland (region Nysa)
- Good knowledge of English (for communication with Belgian colleagues)

For the operation of a water treatment installation at one of our clients in Poland (Region Nysa), we are looking for a hands-on **Water Treatment Operator**.

After an initial training period in Belgium, you will be responsible for the daily operation of the installation on site, with continuous support from our Belgian process experts.

### **Your responsibilities**

As an operator, you ensure the installation runs smoothly and efficiently:

- Taking samples and performing initial assessments of process data
- Monitoring parameters via measurements, graphs and analysis results
- Detecting deviations and carrying out first investigations
- Performing basic maintenance and technical checks on the installation
- Calibrating measurement equipment
- Collaborating with the laboratory and interpreting results
- Reporting findings to the customer and internal teams
- Contributing to process improvements and optimisation

This role combines **hands-on technical work with process insight**.

### **What do we offer?**

- A role in a **Belgian company with over 30 years of expertise in environmental technology**
- Structured training in Belgium with guidance from experienced colleagues

- A position with **autonomy and responsibility**
- Competitive salary aligned with your experience and background
- Laptop, mobile phone and commuting reimbursement
- Continuous training opportunities (internal and external)

### **Why join Trevi?**

- A unique combination of **technical work, responsibility and international exposure**
- The opportunity to build expertise in **sustainable water technology**
- Strong support from a skilled and collaborative team
